DIAPER DEBATE:

NO If's, And's Or
Butts about it!

TOILET
TRAINING

Sustainable
Baby Gear

Beco Potty - Our eco-friendly potties are made from waste plant material, so while they last for years in your home they will start biodegrading as soon as you pop them in your garden.

The ergonomically designed Becopotty is comfortable and easy to use. The high back offers extra support, while the large splash guard helps keep potty training hygienic. Our potty is not only kind on your baby, but also the environment. Available in three different colours.

Available at Bo Béb  Fine Baby Products

"NEW"
Beco Step - coming soon to Bo B b 

BJORN

As with all our plastic products, the potty is made from recyclable, PVC-free plastic.

NEW Smart Potty

The BABYBJ RN Smart Potty is the perfect combination of function and comfort. It is both stable and comfortable, thanks to its ergonomic design. The inner potty makes it simple to empty and clean, and the splashguard prevents spills. The handy size is ideal for smaller bathrooms.

The BABYBJ RN Potty Chair helps your child graduate from the diaper stage. The potty chair is sturdy and rests firmly on the floor. The high backrest and round, ergonomic lines make sitting as comfortable as can be, even for longer periods of time. The inner potty is easy to empty and clean, and the splash-guard prevents spills.

The BABYBJ RN Toilet Trainer makes learning to go to the bathroom a little easier for your child. Soft lines make the toilet trainer a comfortable place to sit and ensure that your child is correctly seated. No sharp edges against baby's skin. It's easy to adjust the toilet seat to fit your toilet the first time you use it.
